

## HIGH LINE SPUR FOR PARK CITY

Union Pacific to Build an Extension.

GREAT REJOICING IN CAMP

WILL GREATLY HELP IN HANDLING OF ORES.

The proposed extension of the Union Pacific high line spur through the Park City mining camp is hailed with joy by the record, which says that it will extend to the Ontario mill, and continues: "This in itself may not seem much, but its importance is indeed great when the meaning of its benefit to the camp is understood. In the first place, it shows that the old Ontario is yet a great producer; that the mill is on a paying basis, and that the management of the company has implicit faith in the mine and in the camp and the salt tunnel will save both time and money, as the product of the mill will now be loaded on the cars without previous hauling and shipped direct to the smelter. The new track will be a continuation of the upper branch of the switch at the Kopp loading station and will terminate at the northeast corner of the Ontario mill. Part of the old building at the mouth of the tunnel has been torn away and excavating and grading will begin immediately. About a half mile of new track will be laid and the ground for this distance must be graded and cut down from five to fifteen feet. Notwithstanding the fact that the tunnel is to be removed, a conservative estimate places the completion of the work at two weeks. Scrapers, plows, and, in fact, a complete equipment for the prosecution of this work, were taken up yesterday afternoon and great progress will undoubtedly be made. The mill will be put in operation again as soon as work in the mine can be resumed, so that the new track will also be put into commission as soon as the mine is finished. It will be the intention of the mine as soon as the cages can be run, so that before the machinery is really covered by the shaft house the property will be in operation again."

While speaking of the extension of the "high line" spur to the Ontario mill, a very well known mining man remarked that he felt satisfied that the side of a year he would be extended to take in the Alliance and Daly-Judge properties. We are also inclined to believe that this will be the case, as such was the original intention, which for several reasons was not carried out. Now, however, the prospects for the camp are most bright and inviting, notwithstanding the general feeling of depression that seems to exist, and we believe that present indications fully warrant such a step on the part of the company. The Park City is undoubtedly on the eve of greater prosperity than she has ever before enjoyed. Many of the prospects that have been undergoing development are slowly, perhaps, but surely nearing the point when they will become heavy producers, shippers and dividend-payers. Among the most foremost of these are the Keith-Kearns, American Flag, Daly and Comstock, not to mention dozens of others which give great promise but are as yet hardly developed enough to warrant such predictions. Then the old standbys of the camp, the great Ontario, Daly-West and Silver King are growing richer daily, while the Daly-Judge will soon be classed with the richest of them. The camp has surely been great, is great and will be greater.

### NEW SMELTER PLANNED.

Cleveland People Organize a \$1,000,000 Company.

The following item of interest to mining men generally is from the Utah State Journal: "Salt Lake valley is to become the arena for another smelter with which to reduce the ores of the state, this upon the assurance of President B. R. Baker, who is secretary of the company by which it is projected and also an official of the Dutchman company operating in the northern canyon. The method, a new one, says Mr. Baker, recovers the metals chemically pure from the ores, and is especially adapted to the treatment of the low grade ores which are so plentiful in the state. The camp has surely been great, is great and will be greater."

"A new patent process for smelting low grade ore has been invented by two well known chemists of Cleveland. A million dollar company has been organized to build a plant in the western ore fields and employ the new process. If the process does what is claimed for it, there will be a complete revolution in the smelting industry."

Mr. Baker received the idea many years ago and spent considerable time in the study of smelting processes, developing his plan fully. Then he became associated with Arthur W. Burwell, both were metallurgists of ability, and after some years of careful scientific study and numberless tests they have finally completed their plan. Their tests have been so often and the results have been so satisfactory, they believe they will be able to handle ores at about one-fourth the present cost of treatment."

"The great value of the invention lies in the low cost of the process which will enable them to handle ore at one-fourth the present cost of treatment, it will put new value in every claim in the western mineral field, they could get rich handling the refuse in the dumps at the big mines as all the dumps contain immense quantities of low grade ore."

The process has been watched by representatives of large mining interests through the west and the test of the merits in a large smelter will also be closely watched."

"The headquarters of the company will be in Cleveland, but the plan is to equip a plant in Utah and introduce the new process there. A considerable portion of the capital necessary for the development of the Utah plant has already been secured and delay will be caused from that source."

A letter from Secretary Many indicates his arrival in Utah at an early date to select a site for the proposed plant."

### GOOD THINGS DOWN SOUTH.

Revival of Activity in the Marysville District.

(Special to The Herald.)  
Richfield, July 23.—Lorenzo Nielson went to Salt Lake this week to order a compressor and Burleigh drills and some other machinery for drilling the tunnels on the property of the Franklin company in the Marysville district. Mr. Nielson was last week awarded the contracts for driving 500 feet on the Log Cabin tunnel and 1,200 feet on the Franklin tunnel. He figures that it will take about eight months to complete this work, which will give close to 1,300 feet in one of the tunnels and 2,000 feet in the other. At this depth he expects to be in the big ore zone which he believes is in the under the craters between the Bullion and Cottonwood canyons. Mr. Nielson while in Richfield this week reports that there is a fine strike in the Outzen property in the Marysville district. A nice ledge of ore-bearing rock has been followed, which shows manganese and copper stains and amethyst quartz. The latter he says is the first that he has any knowledge of on the Marysville side of the mountain. This property adjoins the L. & N. on

the west. The ledge was exposed by the cut of the gulley. They have made an opening along the hanging wall. The ledge has increased to thirty feet in width, and improves very much in value. They have not as yet had any cut assays of this ledge, but the surface went \$2.54 in gold.

Mr. Nielson is now running a 1000-foot tunnel on the property under contract, and it is expected that this work will expose some great values which the company will feel well paid for their work.

There is no mining proposition in this section receiving more attention at present than the Live Oak property, near Monroe. The stock is finding ready takers at 12 1/2 cents per share, and over 60,000 shares have already been disposed of. The company is driving a tunnel as proposed a distance of 800 feet, which expect to strike the convergence of four veins at a depth of about 300 feet. The tunnel is being run at the rate of about five feet per shift. It has become necessary to timber as they go in. All the experienced mining men who have seen this property claim that it will become one of the best in the state, and it is causing a great deal of excitement among that class.

H. O. Weal and B. S. Young attended a special meeting of the Boston & Gold Mountain company Saturday. Mr. Weal while here ordered supplies and tools for beginning work on the property of the above company, which is near the head of Fish creek on Gold Mountain. Mr. Weal will have charge of the tunnel and will start with two shifts this week. The company has plenty of strong backing from the east, and it is their intention to push the work right along as fast as money can do it.

### NEWS FROM THE SOUTH.

What is Going On in the Calientes District.  
A dispatch from Calientes, under date of July 21, contains the following interesting mining news from that section: George Bostwick came in from the front today and brought with him some samples of free gold ore taken from the Highlife claim, which he located last March, and on which he and Frank Burns had parties have run a tunnel on a ledge two feet three inches wide, assaying in free gold \$42 to the ton. They also located a ledge in which blisumuth is the principal element and which, they say, is twenty-three feet wide. They are going to Denver to consult with Davis & Fleck, brokers, who are associated with them in their find.

Mark Langley and Pete Chivers, who have been prospecting north of Moapa for the past three months, brought some samples of free gold ore, in white honeycombed quartz, and some gold-copper ore in which native copper was plainly visible. They say they have located the Ohio group of four free gold claims, on which they have a ledge four feet wide going well in free gold. They have not yet had assays taken from this ore, but it pans big in coarse gold, and they judge it will go to the ton. They have had assays from their gold-copper group, the Red Light, going \$17 gold and 38 per cent copper per ton. They have bonded both these groups Salt Lake people.

Dick Baker and Mike Donahue, company with F. R. Judge of Cripple Creek, passed through camp today en route to the upper Colorado river, where the two former parties located four free gold claims in January this year and sunk a sixty-foot shaft, ran a 130-foot tunnel, and at the breast of the tunnel sunk a seventy-five-foot winze on a three-foot ledge of free gold. They say that on the foot wall there is a three-inch strata of quartz, and that with free gold, going over \$300 the ton, while the remainder of the ledge averages \$62 per ton throughout and is free milling. The ledge is situated at an angle of about 32 degrees and lies between lime and porphyry walls, a narrow strip of lime separating the two on their side.

They are but seventeen miles from Los Vegas ranch and have a good road all the way, with but two miles of sand, which is accessible at all times of the year. They expect, however, to erect a small mill for the treatment of their ore, having ground nearly \$1100 per ton, and a small Mexican arastra on the side of the river. Siemens and Forbes, prospectors who have been working two claims south of Moapa, and who have been in the camp and will go to Ogden in a day or two to have samples of ore examined and assayed, and if the returns are satisfactory, they intend to develop the claims and develop them extensively. They have struck a ledge four feet wide at the grass roots which shows free gold plainly, and which runs high values in gold and silver.

### NO FEAR OF THE FUTURE.

Utah Consolidated Stockholder is Confident.

A large New York stockholder of the Utah Consolidated is quoted as follows in an eastern paper:

"I am not aware what the leading interests in Utah are trying to do in the market except it be a further accumulation of the stock, but if that is the plan I am afraid that they have lost track in their efforts to keep down the price."

"I am thoroughly acquainted with the Utah property and have been from its early days. I have visited the property several times, and know the present selling price of the stock does not begin to represent the value of the property."

"The last annual report showed a 5 cent cost on the 12,000,000 lbs. of copper, but I understand that the actual cost was about 3.50 cents, that \$100,000 of the cash paid under the settlement with the English directors and extraordinary development work, was all paid for by the stockholders, and that which brought the cost up to 5 cents."

"As against these extraordinary expenses last year the company has this year secured a net profit of \$250,000, adding to its smelter, all out of earnings, but I figure that the Utah Co. will be able from this time on to produce 17,000,000 lbs. of copper per annum at an actual cost of under 4 cents per pound, which will return \$5 per share per annum."

"Utah can now be regarded as a sure \$4 per share per annum stock, and with prospective earnings of \$5 per share should be selling at \$50 per share upon its merits. It has a speculative value above this price."

### FAITH IN THE AMAZON.

New Campaign to be Opened on This Property.

Faith in the Amazon in Logan canyon is still high according to the following from the Logan Journal:

About twenty tons of machinery that is to be installed at the Amazon mine in Logan canyon, reached here on Thursday. It comprises a complete compressed air drilling outfit, and cars for carrying machinery for drilling the tunnels which will enable the company to prosecute development work seven or eight times as fast as by the old hand drilling and wheeling.

Manager H. C. Hansen, feels elated over the arrival of the machinery and the prospects for the future. Under the most discouraging circumstances, Mr. Hansen has never lost his faith in the Amazon, but has kept plugging away until his hopes have at last been realized and he has the equipment with which to thoroughly explore the Amazon hill. And there is little doubt that he will make a strike. There are the best of mineral indications at the mine and persistence always wins. The best of the prospect in the state than the Amazon.

"The machinery will be sent up the canyon at once, and as soon as possible will be put in operation. It is all new and cost in the neighborhood of \$20,000."

## ONE CAR OF ORE IS WORTH \$15,000

Bullion-Beck Leases Scoops Out Small Fortune.

MAKES A RICH STRIKE

BELIEVED MAY RESTORE FORMER PRODUCER.

(Special to The Herald.)  
Eureka, July 24.—John Anderson, a leaser in the Bullion-Beck mine, is loading 60,000 pounds of ore that will be one of the best cars to leave that old mine for a long time. The ore is a silver-lead product, and comes from the neighborhood of old workings fifty feet below the 200-foot level, within a few feet of the places from which John Beck's men scooped out a fortune many years ago. It is a selected lot, and besides about 20 per cent in lead, contains about 1,000 to 2,000 ounces of silver to the ton. Mr. Anderson also has a car of second-class ready for shipment, the silver contents of which are better than 100 ounces, with about the same amount of lead as carried by the ore of a higher grade. Anticipating a reluctance on the part of the company to give a renewal of the lease under which he is operating, he is working three shifts in his stope operations, and as the ore is remarkably clean the men are able to break a nice tonnage. The ore shoot is 1,000 feet south of the shaft, and extends to the level of the 200. The Caroline is, or was, an immense chimney of ore which kept the Beck going for several years, and seemed almost inexhaustible. From it radiate small fissures laden with rich ore, which were not of sufficient importance to bother with in the old days, when nothing but the main ore was reckoned as sizable stopeing ground. During the last few years the Caroline has caved so badly that only the most "venturesome" spirits are willing to take a chance there, and recently Superintendent Earls put a padlock on the only entrance to the old stope, excluding everybody therefrom. It is believed that Anderson should look to the Caroline, from which it is yet distant 300 feet, the company will have a fine deposit with which to replenish its bank roll. So important the stope is considered that President Farnsworth came out from Salt Lake purposely to view it, and it is possible that the discovery may have some bearing on the case of the mine to the United States company.

### Notes From the Camp.

(From the Record.)

Ore Shipments.  
K-K..... 148,000  
Daly-West..... 2,800,000  
Silver King..... 1,723,880  
Total..... 4,871,880

James H. Muffett, who is working a lease on the old two mile and one-half ton shipment this week which netted the following values: Lead, 34.85 per cent; silver, 33.45 ounces; gold, \$132. Mr. Muffett paid out \$100,000 to the company and at the same time cleared up much more than wages for himself.

(From the Miner.)

At the New York drifting to the west on the 400 has been suspended and a station cut out, in which good ore was struck, and a winze is now being sunk. The indications are most encouraging. Drifting to the south on the 400 is being continued.

The Daly-West, it is said, is to be closed down for two weeks in order to effect improvements of an important nature. A galloway eighty feet in height (the highest in the state) is to be erected, and the mine will be supplied by skips for hoisting ore. However, the men will be conveyed up and down in cages, which, by an ingenious contrivance, can be substituted for the skips at will.

The Nalldriver has been hoisting high-grade ore all week. Water has been encountered, but not in sufficient volume to cause any trouble.

The American Flag is raising some good ore from the 1,000 level, and no one need be surprised if it develops one of the great mines of the district.

At the Comstock the winze from the 300 level has been sunk in fifty feet of a drift has been started from the bottom of the 300 level, and the drift wall, the entire distance being in the best ore ever struck in the mine.

### GREAT NEVADA MINE.

Another Valuable Discovery in That State.

The Eureka Sentinel reports the discovery of a big mine three miles north of the Nevada mine, in the White Pine county. The ore is found in a funnel-like dike, wall in with granite and manganese on one side and on the other with porphyry. The ore is of the best quality, assayed 334 ounces of silver and 38 per cent copper. The ledge is forty feet wide and assays good from the grass roots to the top of the dike. The surface will go from 1,000 to 3,000 ounces in silver. It is called blisumuth ore, and is the same as that found in Colorado and Montana. The prospects are that the mine will produce some of the richest mines in eastern Nevada, and the only one of its character found in the state.

### WEST IS DOING WELL.

Bright Outlook for the Mining Industry.

The immediate future of the mining industry was never brighter than at present. The price of several months ago, the true of all sections of the west. The vast amount of development work carried on has been completed and new plants, which have been in process of erection for the past several months, are nearly finished. An immediate increase in tonnage will follow as a matter of course. This is especially true of Arizona, Utah and Colorado. Southern Nevada, particularly Tonopah, awaits only the completion of the railroad, now within a few miles of its door, to pour out its store of wealth, which has been impeded by reason of lack of transportation facilities only.

### Indigestion.

With its companions, heartburn, flatulency, torpidity of the liver, constipation, palpitation of the heart, poor blood, headache and other nervous symptoms, sallow skin, foul tongue, offensive breath and a legion of other ailments, is at once the most widespread and destructive malady among the American people. The Herbine treatment will cure all these troubles. 50c bottle. Sold by Z. C. M. I. drug department.

### YELLOWSTONE PARK EXCURSION

August 4.

Round trip from Salt Lake only \$43.50. This covers all necessary rail and stage transportation; and hotel expenses beyond Monday for the seven days' tour. The party will be limited to fifty persons. See Short Line agent for further particulars, and ask for illustrated folder of the park.

Planned day, Sunday, come and go as you please; thirty trains.

### Notice to Contractors.

OFFICE OF THE BOARD OF PUBLIC WORKS, Salt Lake City, June 25, 1904.  
Sealed proposals will be received at this office until 3 o'clock p. m. Friday, July 29th, 1904, for the work of grading, curbing, and paving First street from Second street to Seventh East street, according to plans and specifications in the city engineer's office. The approximate quantities of work to be done are as follows:  
Grading, excavation..... 2,000 cu. yds.  
Grading, embankment..... 3,000 cu. yds.  
Stone curbing, 24-inch..... 350 lin. feet  
Stone curbing, 36-inch..... 200 lin. feet  
Stone curbing cut to special..... 150 lin. feet  
Asphalt paving..... 1,200 sq. yds.  
Cement curb and gutter..... 3,000 sq. yds.  
Stone block pavement..... 500 sq. yds.  
Cement sidewalk pavement..... 2,500 sq. yds.  
Cement gutter along curb..... 800 lin. feet  
Cement gutter inside curb..... 800 lin. feet  
Culverts with concrete covers..... 200 lin. feet  
Culverts with reinforced concrete covers..... 50 lin. feet  
Culverts with cast iron covers..... 100 lin. feet  
Culvert catch basins with concrete covers..... 30  
Ashlar faced rubble wall..... 50 cu. yds.  
Concrete retaining walls..... 1,000 sq. yds.  
Stone coping..... 1,000 lin. feet  
Stone steps..... 2,100 sq. feet  
Concrete steps for stone slope..... 2,100 sq. feet  
Concrete checks for concrete steps..... 750 lin. feet  
ALSO:  
Separate bids will be received at the office of the city engineer for grading, curbing and paving First street from Second street to A street according to plans and specifications in the city engineer's office.

The approximate quantities of work to be done are as follows:  
Grading, excavation..... 2,000 cu. yds.  
Asphalt pavement..... 1,200 sq. yds.  
Stone curbing 1 ft. width..... 1,500 lin. feet  
Stone curbing 3/4 ft. width..... 1,500 lin. feet  
Concrete curb and gutter..... 1,400 lin. feet  
Grading and curbing..... 1,400 lin. feet  
Instructions to bidders, together with plans and specifications for contract and bond can be obtained upon application at the office of the board of public works or engineer. The right is reserved to reject any and all bids. By order of the board of public works.

W. A. WALL, Chairman.  
GEORGE W. SNOW, City Engineer.

### Notice of Special Stockholders' Meeting of Columbia Consolidated Mining Company.

NOTICE IS HEREBY GIVEN THAT a special meeting of the stockholders of the Columbia Consolidated Mining Company is hereby called to be held in room 27, Commercial block, Salt Lake City, Utah, on Friday, the 12th day of August, 1904, at the hour of 2 o'clock p. m. for the purpose of amending the articles of incorporation of said Columbia Consolidated Mining Company in the following particulars: Article VI, which now provides the par value of the capital stock of said corporation shall be fifty cents per share, is to be amended to read as follows:

"ARTICLE VI.  
"The limit of the capital stock of this corporation shall be the sum of one hundred and twenty (\$120,000) shares of the par value of five dollars (\$5.00) per share."  
The limit of the capital stock of this corporation shall be the sum of one hundred and twenty (\$120,000) shares of the par value of five dollars (\$5.00) per share."

TONY JACOBSON, President Columbia Consolidated Mining Company.  
Dated July 20, 1904.

### Notice of Assessment.

COMSTOCK SILVER MINING COMPANY. Principal place of business Salt Lake City, Utah. Location of mines, Utah Mining district, Summit county, Utah.

Notice is hereby given that at a meeting of the board of directors of the Comstock Silver Mining Company, held at Salt Lake City, Utah, on the 24th day of June, 1904, an assessment of 25 cents per share being assessment No. 5, was levied upon the capital stock of said corporation, and the same is payable immediately to A. HANAUER, Jr., president of said corporation, at the office of the company, 415 Progress building, Salt Lake City, Utah. Any stock upon which said assessment has not been paid on or before the 27th day of July, 1904, will be delinquent and advertised for sale at public auction and, after which, the payment will be sold at the company's office on Monday, the 15th day of August, 1904, at 2 o'clock p. m. to pay the delinquent assessment, together with the costs of advertising and expense of sale.

A. HANAUER, Jr., President.  
Room 415 Progress Building, Main Street, Salt Lake City, Utah.  
Dated June 24, 1904.

### Assessment No. 4.

THE CRUSADER CONSOLIDATED MINING COMPANY, principal place of business Salt Lake City, Utah. Location of mines and works, Utah Mining district, Utah county, Utah. Notice is hereby given that at a meeting of the board of directors of said company, held on the 24th day of June, 1904, an assessment of 10 cents per share was levied on the capital stock of the corporation, payable immediately to the secretary at the office of the company, 415 Progress building, Salt Lake City, Utah. Any stock upon which said assessment has not been paid on or before the 27th day of July, 1904, will be delinquent and advertised for sale at public auction and, unless payment is made before, will be sold on Saturday, the 25th day of August, 1904, at 1 o'clock p. m. to pay the delinquent assessment, together with the costs of advertising and expense of sale.

ERNEST WILLIAMS, Secretary.  
Salt Lake City, Utah, June 25, 1904.  
First publication, June 25, 1904.

### Notice of Assessment No. 10.

THE SILVER SHIELD MINING AND MILLING COMPANY, principal place of business Salt Lake City, Utah. Location of mines and works, Utah Mining district, Utah county, Utah. Notice is hereby given that at a meeting of the board of directors of the above named company, held on the 24th day of June, 1904, an assessment of 10 cents per share was levied on the capital stock of the corporation, payable immediately to E. H. Mead, assistant secretary, at 514 McCormick building, Salt Lake City, Utah. Any stock upon which said assessment has not been paid on or before the 27th day of July, 1904, will be delinquent and advertised for sale at public auction and, unless payment is made before, will be sold on Monday, the 15th day of August, 1904, at 2 o'clock p. m. to pay the delinquent assessment, together with the costs of advertising and expense of sale.

Assistant Secretary, 514 McCormick building, Salt Lake City, Utah.  
Dated June 24, 1904.

### NOTICE.

City Poundkeeper's Sale.

NOTICE IS HEREBY GIVEN TO THE OWNER or owners of the animal herein after described, and to whomsoever it may concern: That there are impounded at present time in the city pound the following described animals: One brown mare about eight years old, with white blaze on her face, and one white horse about eight years old, and all amounts due thereon, said animal taken away within ten (10) days from the date of the first publication of this notice, it will be sold by the poundkeeper, at public sale, at city estray pound, in this city, at the hour of 2 p. m., to the highest bidder. Date of first publication July 21.  
G. H. MORRIS, Poundkeeper.

### WANTED:

Subscription representatives for Salt Lake county by one of the largest and most popular magazines in America, to whom can be turned over each month expiring subscriptions for renewal; also to secure new subscriptions on a special basis which will enable the publisher to increase his circulation in this locality. Magazine reading is on the increase. Where one magazine was subscribed for ten years ago, three are taken today. Every year hundreds of dollars are lost out in every community that has not a subscription business in this locality. Most of this money is sent direct to publishers by people who prefer to do business through a responsible local representative, thus relieving themselves of the trouble. Our representative renew upwards of 90 per cent of subscriptions on the expiration date furnished by the publisher for authority and terms. Address PUBLISHER, Box 50, Station O, New York City.

### An Ordinance.

AN ORDINANCE LEVYING A TAX and for the assessment of property on the north side of Sixth South street from Sixth East street to Fifth East street, and on the south side of Fifth East street from Sixth East street to Fourth East street, in sidewalk district No. 22, for the construction of a cement sidewalk.
